

Natural Action Technologies, Inc.

SUPER SHOWER UNIT

Information Sheet and Use Ideas

Congratulations!

You have just received a Natural Action Technologies Structured Water Unit.

IMPORTANT

The Super Shower Unit is a multi-functional device designed to be screwed into a shower arm and produce a wonderfully uplifting structured shower or bath. It can also increase the energy, improve the flavor and taste, and neutralize the toxins of any liquid or beverage. It's also capable of structuring water for gardens and landscapes.

Specifications

Weight: 13.4 oz.

Dimensions: 7.5" L, 2.5" Diameter

Volume: 5 oz.

Melting Point: 513°F (or 267°C)*

* The melting point refers to the ABS Plastic of the container and the flow form within. Thus, taking hot showers and pouring boiling water through the unit for uses such as making tea or coffee will be okay.

1. **Cleaning Unit:** Clean by soaking the unit in a bath of water and apple cider vinegar, boiling water, or running thru the dishwasher.
2. **Storing Unit:** The Super Shower can be drained and stored in either direction, i.e., spout up or spout down.
3. **Warranty:** This unit comes with Lifetime Warranty against manufacturer defects. Misuse of the unit is not covered.
4. Avoid leaving this unit in freezing temperatures with residual water inside as impaired function may result.
5. Avoid dropping this unit as it may result in impaired function.

Installation Instructions

Note:

- *Your unit comes pre-wrapped with white plumber's tape ready for installation. Leave this on for leak-proof operation. Some plumbing fixtures may require additional tape.*

WHAT'S IN THE BOX? Shower Unit with nipple attached

- Original
- Dynamically Enhanced

1. Remove existing showerhead. Clean the shower pipe threads with an old toothbrush or rag to remove debris. Apply a light coat of soap to the pipe threads. The unit may be threaded easily onto a 1/2" pipe.
2. Install the shower unit to the 1/2" shower pipe in wall. Be aware of possible cross threading. (The unit should start on the pipe threads easily when it is lined up correctly. Be patient here. Thread gently! If cross threading should occur, a 1/2" tap, obtained through a hardware store, can be used to rethread the unit.)
3. Next, thread the showerhead onto the shower unit. Note: Some people choose to leave the showerhead off if they are going to fill water containers or the bathtub. More units may be added for a maximized energized bath or water.
4. Tighten the shower unit to the shower pipe, and the showerhead to the shower unit sufficiently to prevent leakage. Over tightening may make it difficult to remove, or cause damage to the threads. **Your shower installation is now complete! That was easy!**

Shower Unit on Shower Arm

IMPORTANT ADDITIONAL NOTES

1. If showerhead is too low, it may be necessary to purchase an extension shower arm (shower riser) or adjustable shower adapter.
2. If a 10" extension shower arm (shower riser) is used, remove the existing shower arm and install the 10" riser in its place.
3. Follow the same procedures (Steps 3 - 6) installing the shower unit between the adapter and the showerhead.

IDEAS FOR ENJOYING THIS SUPER SHOWER UNIT

There is nothing like taking a structured shower or bath! When a first time user of the Super Shower Unit takes a bath with this unit, they instantly and automatically recognize happily the joy of structured water because their skin glistens and their body vibrates. Anyone or anything bathed in structured water benefits! Therefore, apply the water from this unit to yourself, pets, kitchen, and garden.

Thanks for helping maintain a green earth environment.
